

# STAYING SUSTAINABLE

ACTING NOW FOR A SUSTAINABLE FUTURE

At De Vere we're committed to reducing our environmental footprint, protecting the natural world that enriches our hotels and playing our role in our valued local communities. To do this, we're driving change across our operations, supply chains and communities.

## 01

### OPERATIONS

Making day-to-day changes for a better tomorrow

We recycle over 100 tonnes of waste each month across the group,  
THE EQUIVALENT OF OVER

**11 BLUE WHALES**  
EVERY YEAR.

We've already saved 626kgs of plastic in 2019

THE EQUIVALENT OF A

**FULLY GROWN MALE POLAR BEAR.**

Over the course of a year we'll use 66,278 litres of biodegradable cleaning products opposed to their more hazardous alternatives

THIS IS ENOUGH TO FILL

**368 BATHS.**

Each year the total free charges we provide is enough to power an ELECTRIC VEHICLE

**2.5**

TIMES AROUND THE CIRCUMFERENCE OF THE GLOBE

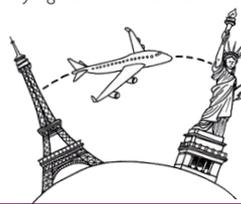

We're saving over 850 tonnes of CO<sub>2</sub> each year, which is more than the average emissions of

**FOUR**

FULLY-LOADED JUMBO JETS

flying from Paris to New York.

We make 84,728Kg of CO<sub>2</sub> savings across a year, which is the equivalent of removing

**680**

FAMILY CARS FROM THE ROAD EVERY YEAR.

## 02

### COMMUNITY

Making local areas part of something greater

WE HAVE CREATED

**3,800M<sup>2</sup>**

OF WILDFLOWER HABITAT

to support biodiversity, pollinating insects and bees.

EACH YEAR WE DONATE OVER

**100**

**HOTEL BREAKS**

to members of the community that are most in need.

**175**

COLLEAGUES

have completed our health & wellbeing courses.

## 03

### SUPPLY CHAIN

Making sure sustainability starts at source

We've saved an estimated 1,923,700 haulage miles by halving our suppliers and reducing the amount of deliveries to our properties.

THAT'S ENOUGH FOR

**EIGHT TRIPS TO THE MOON.**

We save up to 390,000 single-use plastic straws a year which, if placed end-to-end, would be

AS TALL AS

**NINE MOUNT EVERESTS.**
